

# Key Chain Magnet POP DISPLAY BOX

## Introducing Our Newest Counter Display

Our new countertop Key Chain Magnet Display Box makes a big impact in a small space. The metal plate in the bottom of the box holds 24 key chains in six colors; red, green, orange, blue, white, and black, keeping them organized and demonstrating the powerful attraction of the magnets. The slim, lightweight plastic key chains house powerful neodymium magnets that are strong enough to hold up to four pounds, but won't damage key fobs. They are useful for organizing keys and detecting ferrous metals.

07614DSP

## Features

- A metal plate keeps the key chains neat, organized and prominently displayed to attract the buyer
- The customers will feel the pull strength of the magnet when they grab it off of the metal plate
- Small footprint takes up less space on the counter
- High profit margin display encourages impulse buyers
- Each key chain is individually UPC coded.
