

CLAW COVER® C9

Powerful Protection in a Mid Weight Glove

APPLICATIONS

Food Processing
Off Hand Glove
Direct Food Contact

FEATURES

With better worker training and protective equipment, injury rates in food processing have declined for more than a decade. Some of that can be attributed to cut resistant gloves with increasingly higher cut protection levels. Like the Claw Cover® C9 food processing glove, a 10 gauge knit that scores ANSI level A6 cut resistance via a precise blend of high performance fibers and stainless steel. As a mid weight, the C9 delivers good manual dexterity, too. Great laundry features and abrasion resistance give it a long wear life and excellent value. The Claw Cover C9 food processing glove is compliant with FDA 21 CFR 177.2800, appropriate for direct food contact.

ATTRIBUTES

STYLE	Seamless knit
