

CLAW COVER® C2

Versatile Choice for Knife Hand or Off Hand

APPLICATIONS

Food Processing
Knife Hand Use
Off Hand Use
Direct Food Contact

COLORS

FEATURES

The Claw Cover C2 glove is a real multi tasker – a smart solution for food processing operations where some workers need off-hand protection, others need a knife-hand glove. With ANSI level A5 cut resistance, it's tough enough for off-hand use. Yet it's light weight and flexible, with the dexterity in demand for the knife hand. These benefits meet in a single glove through a precise blend of high performance fibers and steel. Stands up to repeat washings for long wear life. You can even use moderate bleach to restore whiteness to a white C2 glove. The Claw Cover C2 food processing glove is compliant with FDA 21 CFR 177.2800 and approved for direct food contact.

CLAW COVER® C1

Ultra Light Weight with Dexterity and Cut Resistance

APPLICATIONS

Food Processing
Knife Hand Glove
Direct Food Contact
Use as a Liner Glove

COLORS

FEATURES

Get the right combination of dexterity and cut protection that's ideal for knife hand use. The Claw Cover® C1 food processing glove is a fine, ultra light weight knit that provides fingertip sensitivity for outstanding manual dexterity. Delivering ANSI level A4 cut resistance, a blend of high performance fibers protects against the wounds typically incurred in food processing. Excellent laundry benefits – including the opportunity to restore whiteness to the white C1 food glove with moderate use of bleach – give you long wear life and exceptional value. The C1 food processing glove is compliant with FDA 21 CFR 177.2800 and approved for direct food contact.
